

Sprint 1 Review meeting

Performed by: Nguyễn Duy Đức, Reviewed by: Nguyễn Minh Trí, Edited by: Đào Hưng Khoa

Date/Time: 04/06/2026, 14:45 - 15:10

Platform/Meeting location: Discord

Sprint: 1 (Week 2)

Present:

- Nguyễn Minh Trí: Chair
- Nguyễn Duy Đức: Secretary
- Đào Hưng Khoa: Team member
- Nguyễn Phúc Bảo Phúc: Team member
- Nguyễn Thúy Hằng: Team member

Absent: None

- **What went well:**

- Communication was very active in Messenger.
- We agreed on the core project idea quickly without major conflicts.
- Team participation was very enthusiastic, everyone had a hand in pitching in new ideas.
- Team members all set up development tools quickly at the discretion of the project lead, the team adhered to the Git folder structure, maintained private repo security, and all registered for GitHub Copilot/Education.

- **What went wrong:**

- We started writing our project documentation before properly assigning Trello cards.
- While communication was very active, and positive, there was still team miscommunication regarding goals/documentation.

- **What problems and what caused the problems:**

- Problem: Trello cards assignment.
- Cause: We had to research which platform to use (Jira vs Trello vs Asana) before reading documentation/guides as to how we can use said platform. This added a delay before we can properly assign Trello cards, by which time it was already Week 2 of Sprint 1.
- Problem: Team miscommunication.
- Cause: While everyone participated actively in communication, communication was still sometimes unclear between team members and understanding regarding certain project ideas/topics was hard to reach effectively.
- Problem: Meeting length.
- Cause: At first, meeting length was too long as we jumped into meetings without prior establishment of meeting agenda. While this allowed everyone to freely brainstorm and be creative, this also resulted in a long meeting times.

- **What can be done differently in the next sprint to improve:**
 - Assign Trello tasks during the Planning meeting, or at least right after a Planning meeting.
 - Keep announcements/communication to the point, and not be too wordy/unconcise. Still encourage communication between team members.
 - Establish meeting agendas and goals prior to having them, and prioritize finishing what's on the agenda before moving onto brainstorming/discussions.
- **What lessons we could learn:**
 - We need to better define and establish/identify most relevant problems/tasks first in order to ensure a smoother and more logical workflow for the team.
